

DB SCHENKER Land Operations

Efficient transportation is the prerequisite to conducting your business successfully. DB Schenker is the leading European logistics services provider for scheduled groupage services, part load and full truck load transportation.

DB Schenker's dense land operations network spans across Europe operating in more than 700 locations in over 30 countries. The hallmarks of our service are:

- Operation of over 5000 scheduled international transportation lanes daily, linking Europe with a fast, efficient and reliable door-to-door-transportation service.
- Powerful national networks, providing fast and reliable domestic transportation services across Europe.
- Sophisticated information and communication technology.

Our services meet customer requirements for extensive market coverage and high frequency shipments, resulting in shorter lead-times and more reliable flow of goods.

In addition, DB Schenker recognises that customers increasingly demand multi-modal logistics solutions. Sensitive to such requirements, Schenker offers rail transportation or combined land-rail traffics.

Blending DB Schenker road transportation capabilities with its other transportation services, such as rail, sea or air, DB Schenker offers individual customer-specific multi-modal transportation. More significant, our solutions meet both the ecological and economic client-objectives.

DB SCHENKER Land Operations

Services available

Precise control on flow of goods.

With our products DB SCHENKER*system*, DB SCHENKER*top* and DB SCHENKER*top12*, we have developed a new service standard for logistics services in land transportation throughout Europe.

DB SCHENKER*system*:

The affordable and reliable service for your European clients.
Systemised and scheduled.

DB SCHENKER*top*:

The fast connection for consignments to your European clients.
Clearly defined lead times and money back guarantee.
For selected countries.

DB SCHENKER*top12*:

Even faster connections for consignments with clearly defined lead times
and a delivery latest by noon. Fast and safe with money back guarantee.
For selected countries.

Your advantages are considerable:

- Deadline promises which were previously made verbally will now become reliable and secure. This lead-time security is now the standard for time-critical replenishment and/or single part transport.
- With 100% deadline commitment your planning of the whole supply chain can be substantially improved and secured.
- With delivery no later than noon, the goods will be available for sale, processing or production in the afternoon.
- Due to uniformed transport orders and special labels you can clearly and easily distinguish the type of service you choose.
- Money back guarantee for top-products in the unlikely case of not meeting the product specific criteria.
